

# Origami Corner Bookmark

## Step 1: Create an Origami Folding Paper

Cut on the dashed lines to create a square shape and remove excess paper.

## Step 2: Form a Triangle

- Fold the paper in half diagonally to form a triangle, showcasing the goat face only on one side of the diagonal. Ensure the points align neatly and crease the fold well.
- Rotate the triangle, so the long, folded edge faces you and the goat image is on the back.

**Step 3:** Fold down the top layer's pointy tip towards the bottom fold, creating a smaller, inverted triangle "pocket."

**Step 4: Fold the Corners:** Take the left and right corners of the triangle and fold them up to the top corner or peak of your diamond shape. The left and right corners that were folded up have become flaps. Make firm creases on the fold lines.

**Step 5: Tuck In the Flaps:** You will notice a pocket was formed in step 2. Take the tip of the flaps you've just folded up and gently tuck it into the pocket. Your origami Mountain Goat Corner Bookmark will fit snugly on the corner of a page.
